

## What do I need to be able to geocache at Camp Lewallen?

At a minimum you need a device (handheld GPS, smart phone, etc.) that will allow you to enter coordinates of a cache. However, knowing a good route to the cache will be difficult, unless you plot the coordinates on a camp map.

We highly suggest you use a smart phone and download the **Avenza Maps** app, which can be used without an internet connection. For the purposes we will use it for, the app is free

You will need to do the following:

1. Click or copy the following link

[https://drive.google.com/file/d/1yETUZYC\\_oWS7srTjy4SwDaUlebatOLju/view?usp=sharing](https://drive.google.com/file/d/1yETUZYC_oWS7srTjy4SwDaUlebatOLju/view?usp=sharing)

2. Paste the link into your smart phone browser and hit enter.
3. Download the file.
  - Remember where you save it (on phone, on iCloud, etc.) because you will have to select it later on.

4. Download the free **Avenza Maps** app to your smart phone.

5. Open the app and register yourself with Avenza Maps

6. Go to "Store"

7. Enter Greenville, MO in the location field, you can pick any year.

8. Download the free "Greenville, MO (2021, 2400-scale)" file that is 4.7 MB

9. Open the map

10. Click on "Map Layers" at the bottom right of screen which looks like this

11. Click on "Import Data" at the bottom right of screen which looks like this

12. Click on "From Storage Locations"

13. Select the KMZ file which you downloaded in step 3.

14. Click on Close and go to "My Maps" and start geocaching by entering provided coordinates and picking the best route. You should see a map of camp with property lines, roads, trails and waypoints indicating the location of various things.
