SIUE Adventure Loop Workshop – LIONS and TIGERS

Saturday, September 26th

Join us at the SIUE STEM Center for an exciting hands-on workshop where **Lions** and **Tigers** dive into science, technology, engineering, and math while completing Adventure Loops and exploring a real college campus! Scouts will complete two Adventures per session, using the university's labs and resources to bring their projects to life. Expect interactive experiments, creative builds, and a ton of "*aha!*" moments guided by the SIUE STEM education team. Choose the morning session, afternoon session, or go all-in for the full day of STEM-powered fun!
