

2022 CUB PACK - Fall Camporee Follow Ups

Important Date! Tree Pick Up

Saturday, October 15

8:30 – 11:30 a.m.

**Olivette City Center
1140 Dielman Road
Olivette, MO 63132**

Forest ReLeaf is providing a 3-gallon tree for each Pack that attended the Camporee. The trees will be suitable for just about all locations. We expect to get Red Buds and/or Fringe Trees.

- Same person picking up your Scouting for Food Bags/Maps can collect the tree. An SUV with a back seat down will work; or, of course, a pick-up.

Additional Learning Resources

- **Birding: Merlin Bird ID App** by Cornell

- Free App (but you do need to sign up with their birding program) that lets you use your phone to listen to bird calls. The app then identifies the bird(s) you hear and gives you more information about them
- Right now is a great time to listen as birds are actively migrating through our area.

- **Plant Identification: iNaturalist App**

- Free app (again you can sign up to access more features). Through this app, you take a picture of a plant, provide its' location, and a naturalist will identify the plant. It's usually a quick response as naturalists are usually online and checking the plants coming in.

- **Tree / Forest Ecosystem Podcast from RadioLab**

- Leaders and Parents can listen to this fascinating Podcast from RadioLab. You'll learn how trees in the forest are connected through an underground network of roots, tubes, and lichen.
